Our dedicated team includes medicine and surgery specialists, and offers exceptional patient care in a well-managed environment where barrier-nursing techniques are applied to maximise infection control.

Specialised services include
- Overground endoscopy and upper airway surgeries
- Laparoscopy (keyhole surgery) including rig operations
- Heart scan and exercise ECG
- Medical and surgical colic management
- Video endoscopy and gastroscopy
- Arthroscopy for chip and OCD removal from joints
- Neonatal emergency and critical care

All services are supported by expert anaesthesiologists and advanced diagnostic imaging including CT, bone scan, digital radiography and ultrasonography.
