Client Questionnaire

Behaviour Category	Age first seen	Score:mild moderate severe
Confusion – awareness – spatial orientation		
Gets stuck or cannot get around objects		
Stares blankly at floors or walls		
Decreased recognition of familiar objects or people		
Goes into wrong side of doors/walks into doors/walls		
Relationships – social interactions		
Decreased in patting/avoids contact		
Decreased greeting behaviour		
Overdependent/clingy		
Altered relationship with other pets – less contact		
Altered relationship with other pet – anxiety, fear		
Aggression – family members/unfamiliar people		
Aggressions – family pets/others		
Response to stimuli		
Decreased response to auditory stimuli (sound)		
Increased response (fear/anxiety) to auditory stimuli		
Decreased response to visual stimuli		
Increased response (fear/anxiety) to visual stimuli		
Decreased responsiveness to food/odour		
Activity – Anxiety-increased/repetitive		
Pacing/wanders aimlessly		
Snaps at air/licks air		
Licking – owners/household objects		
Vocalisation		
Increased appetite		
Restlessness/agitation		
Activity – apathy/depressed		
Decreased interest in food/treats		
Decreased exploration/activity		
Decreased interest in social interactions/play		
Decreased self-care		
Sleep-Wake cycles/reversed day-night schedules		
Restless sleep/waking nights		
Increased daytime sleep		
Learning and memory – house soiling		
Indoor elimination when previously trained		
Decrease/loss of signalling “need to go”		
Goes outdoors/then goes indoors again and eliminates		
Elimination in sleeping area		
Learning and memory - work/tasks/commands		
Impaired working ability – decreased ability to perform tasks		
Decreased responsiveness to familiar commands		
Inability/slow to learn new tasks
